

2nd July 2018

The following is an announcement from BASIS International dated 1st July 2018 and taking effect 1st October 2018. Effectively the availability and sale of BASIS Standard Edition License types will end 30th September 2018 to be replaced by the new Extended Edition license type. More details and price lists will follow in the next few days.

A new **Extended Edition BASIS license** has been created combining all of the features and functions of the existing Standard and Enterprise Editions. Therefore, BASIS will be sunsetting the Standard and Enterprise Edition license types on October 1, 2018. This effectively eliminates the artificial barriers to access the most advanced, modern multi-tier features of the BASIS technology stack by making these features available to **all** applications and installations. Those with the Enterprise Edition will automatically receive the Extended Edition license upon re-registering after October 1, 2018.

For the Standard Edition community, BASIS offers a free upgrade to the Extended Edition for all Standard Edition licenses covered by SAM (maintenance and support) on October 1, 2018!

What about a Standard Edition license without SAM?

Read on for a limited time discounted upgrade opportunity at a savings of up to 40%.

Limited Time Opportunity to get a Low-Cost Upgrade

The new Extended Edition license provides all of the BBj tools and deployment options you need to take legacy applications to the next level. Now is the time to take advantage of a great offer.

Reinstate the expired SAM coverage for your Standard Edition license and get the Extended Edition with its long list of features, **at no additional cost** on October 1! That's an approximately 40% saving over a regular upgrade to the Extended Edition license! This limited time offer expires on October 1, 2018. Thereafter, upgrading to the Extended Edition will incur the normal upgrade fee.

- Examples in Canadian dollars and cents:
 - 20-user Standard Edition license with an inactive SAM plan
 - Upgrading to the Extended Edition, List Price of \$7780.00 (SAM value included)
 - Upgrade and reinstate SAM under this program until 28th September 2018
List Price of \$4840.00 and receive an Extended Edition License 1st October
 - A **\$2940.00 saving (~37% off)**!
 - Any-user count Standard Edition license with SAM coverage on October 1, 2018
 - No cost upgrade to the Extended Edition
 - Priceless (100% off)**!

Considering system upgrades in the next few years requiring the move to the Extended Edition to leverage more modern multi-tier architecture? Take advantage of this transition offer NOW!

- Upgrade your client base today!

**Act now and enable your no cost
or steeply discounted upgrade**

Extended Edition Delivers Security, the BASIS DBMS, and Much More

	
<p style="text-align: center;">Digital Dashboard Framework</p> <p>A fully functional pre-built digital dashboard has been created for you to install on your development machine where it can be pointed to your data. Data can be retrieved via standard READ/READRECORD logic in stored procedures. This business intelligence tool adds <u>huge</u> strategic value to your character or graphical application. Read more...</p>	<p style="text-align: center;">Critical Security Upgrades</p> <p>The latest release of the BASIS product set includes a critical security and feature update improving Sarbanes-Oxley (SOX) and Payment Card Industry (PCI) Data Security Standard (DSS) adherence that every compliance officer should be made aware of. Read more...</p>
	
<p style="text-align: center;">BASIS DBMS</p>	<p style="text-align: center;">XCALL</p>
<p>Included with an Extended Edition license for PRO/5 installations is immediate access to the BASIS DBMS, previously unavailable to our PRO/5 community, via the fast memory mapped protocol. Visual PRO/5 applications can also gain access to the BASIS DBMS with a simple port number change. Read more about the BASIS DBMS's built-in functionality such as replication.</p>	<p>This PRO/5 and Visual PRO/5 language verb, similar in function and syntax to the CALL verb, gives access to BBj features previously unavailable to our PRO/5 and Visual PRO/5 communities such as ODBC/JDBC connections, web services, browser user interface (BUI) applications, modern report writing, Google Doc integration, fax and email utilities and much, much more... Read more...</p>

If you are running a Standard Edition license (single-tier architecture), you have three months to take advantage of this savings opportunity.

Activate SAM coverage on your Standard Edition license at existing Standard Edition upgrade pricing before October 1, 2018, and take delivery of the Extended Edition and all of its advanced features at no extra cost on October 1, 2018.
